DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/10/03 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Talluri et al (6,026,183) for the same reasons as set forth in Section 8 of the previous office action, paper number 4, dated 2/11/03.

With respect to the newly amended limitation, it is noted that the limitation has already been addressed in previous office actions with respect to claims 2, 12, and 15.

Response to Arguments

4. Applicant's arguments filed 4/13/06 have been fully considered but they are not persuasive. Applicant asserts on pages 8-9 of the Remarks that Talluri et al fails to disclose the transmitting step. However, Figure 11 of Talluri et al illustrates the concept

of such image information with the lowest resolution coefficients (e.g. HH3) be transmitted before image information with higher resolution coefficients (e.g. HH2 and HH1) are transmitted.

Similarly, applicant asserts on pages 10-11 of the Remarks that Talluri et al fails to disclose the decomposing step. However, Figure 10 of Talluri et al illustrates the concept of such highest resolution coefficients (e.g. Fig. 10a) be used to decompose the original image into subbands, and after that the lower resolution coefficients (e.g. Fig. 10b) be used to decompose the subbands into further subbands (e.g. Fig. 10c).

Conclusion

5. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2621

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
